Job Description
Nurse Scientist-18259

Description

This position manages the daily operations of the clinical procedure space in the Human Metabolic Research Unit (HMRU), performs clinical procedures for human participant research in the HMRU, collaborates with the administration of Gannett Health Services to meet the University's medical oversight requirements, assists faculty with Institutional Review Board (IRB) proposal submissions and provides instruction for the DNS Post-Baccalaureate Program in Health Studies.

This position manages the ongoing staffing, facility and financial resources of the HMRU in support of faculty research involving human participants. The incumbent will manage the ongoing financial, operating and facility needs of the HMRU clinical procedures space and will report to and work with the DNS Director and the DNS Executive Director of Administration and Finance to meet these needs. This position will assist principal investigators and their staff in meeting and resolving administrative issues associated with their research conducted in the HMRU.

This position will understand Cornell and external requirements for conducting human participant research, and will work with the administration of Gannett Health Services to meet these requirements in performing clinical procedures required by, and in support of, this research.

The incumbent will work with the Director of the DNS Post-Baccalaureate Program in Health Studies to provide didactic and laboratory based instruction to students in this program.

This is a full-time year-round position available immediately.

Apply on-line.

Qualifications

Required:
RN and PhD degree or equivalent; at least 2 years of clinical nursing experience in a relevant setting (e.g. hospital or outpatient facility) or
equivalent. Experience or demonstrated ability to manage a clinical/research facility. Licensure as an RN in New York State. National and New York State nurse practitioner certification.

**Preferred:** Experience providing health-related academic instruction. Training and experience performing clinical procedures such as, but not limited to phlebotomy, subcutaneous fat biopsy, muscle biopsy, etc.

*Cornell University is an innovative Ivy League university and a great place to work. Our inclusive community of scholars, students and staff impart an uncommon sense of larger purpose and contribute creative ideas to further the university's mission of teaching, discovery and engagement. Located in Ithaca, NY, Cornell's far-flung global presence includes the medical college's campuses on the Upper East Side of Manhattan and Doha, Qatar, as well as the new CornellNYC Tech campus to be built on Roosevelt Island in the heart of New York City.*

*Diversity and inclusion have been and continue to be a part of our heritage. Cornell University is a recognized EEO/AA employer and educator.*
